SUMMARY

Motivated and detail-oriented **Software Developer** with a completed Diploma in ICT and hands-on experience building full-stack applications using **Python, Java, PHP, JavaScript, React, Spring Boot, and automation tools**. Skilled in debugging, testing, API integration, and workflow building. I bring a strong learning mindset, excellent teamwork abilities, and a passion for solving technical problems. I am eager to contribute to automation, backend development, scripting, and software quality while growing into a well-rounded developer.

EXPERIENCE

Junior Web Developer

Plum Systems

Jul 2024 - August 2025, Cape Town

- Maintained and updated client websites using **React, PHP, and Joomla**, ensuring high performance, security, and design consistency.
- Collaborated directly with clients to understand requirements, gather feedback, and translate business needs into technical solutions.
- Led a small development team on assigned tasks, providing guidance, delegating work, and ensuring deadlines were met.
- Troubleshoot and resolved website issues, bugs, and user experience problems, improving site stability and functionality.
- Developed and optimized reusable components and templates to streamline future development work.
- Implemented UI improvements, feature updates, and content changes across multiple client websites.
- Performed quality assurance testing and ensured all updates met functional and design specifications.
- Documented system changes, website processes, and update procedures for internal use and client reference.
- Maintained version control workflows using GitLab for clean and traceable development history.
- Enhanced site accessibility by updating semantic HTML structures and ARIA roles, supporting compliance with industry accessibility standards and improving user experience across diverse devices.

EDUCATION

Diploma in Information Communication Technology

Cape Peninsula University of Technology (CPUT) • Cape Town • 2025

- Acquired robust programming expertise in Java and Python, emphasizing software development, problem-solving, and application architecture.
- Proficient in constructing and refining applications, with a deep grasp of algorithms, data structures, and core software engineering concepts.

SKILLS

- **Programming:** Python, Java, JavaScript, PHP, SQL
- **Frameworks/Tools:** Spring Boot, Spring Security, React, React Native, Joomla, n8n (basic), Git, GitHub, GitLab
- **Technical:** API integration, debugging, workflow automation, QA/testing, documentation
- **Other:** Problem-solving, communication, teamwork, adaptability, willingness to learn
- **Networking Knowledge:** HTTP, basic networking concepts, REST APIs
